Mr. Ware, Judge of the United States District of Maine, has delivered an opinion in the case of the "William Arthur," libelied under the recent acts of Congress of August 6th and July 13th, 1861. The opinion is important in two points of view; first, as an elaborate and conclusive judicial exposition of she laws; and in this connection we may state that several members of the Cablinet have expressed themselves highly pleased with it; and secondly, for its impressive statement of the duties of our Government in the unused position in which is finds itself. In enforcing this point she Judge cites the declaration of war made by Eogland against France for having allied herself with us in the war of the Revolution and says, with much polest: "The declaration is characted from the British Cabinet, of which "Lords Thurlow and Loughborough formed part, and clearly show that is her understanding of the law of nations, revivoited nations are not acknowledged as a nation under that law. This company, consisting of some sixty size men, under the command of John Brown, Jz., a ron of him who met so sad a fate in Virginia, arrived in this city at Ty & clock had night, on the Michigan Southern Railross, and after a supper provided for them at 125 Dearborn street, proceeded to quarters as signed to them at No. 200 Lake street. The company has been in camp at Clerahad about a month, and is composed of hunters, lumbermen, de., all first-rate shots, and expable of emduring hardships such as would kill an ordinary mas. The Captain, John Brown, Jr., is a man apparently about shirty jears of age, large, well bulk, of a somewhat florid complexion, with a firm and decided look—full of energy and daving. The railroad company are to go against them in the courts—rather pay the claim than stand a suit, and thus they come weekly, sometimes ofteners. Now is this right? May people be allowed to left cattle range over streets, by-rays, railroad crossings, etc., day and high, and then compel the railroads to pay for all the cattle range over streets, by-rays, railroad crossings, etc., day and high, and then compel the railroads of or the substitution of the committee of the committee of the committee of the committee, and we shalk that these continued demands, and we shink the managers are right.
